THE REAL TESLA

The real Nikola Tesla was one of the greatest inventors of his time. He was a pioneer in his field and without him we would not have the electricity we use today. He spoke 8 languages and had over 700 patents. He created the first remote controlled robots, the technology that was the basis for x-rays, and FM radios. He had a vision to have free wireless energy and wireless communication, which would connect the world globally. He was an eccentric with OCD but his genius cannot be denied. He was a renowned inventor while alive and thankfully in the past few years is finally regaining some of the recognition he deserves. His visions sparked scientists after him and the scientific due to his diligent hard work.

*"I do not think there is any thrill that can go through the human heart like that felt by the inventor as he sees some creation of the brain unfolding to success . . . Such emotions make a man forget food, sleep, friends, love, everything."
- Nikola Tesla*

HYAKU-EN MEANS 100 YEN AND IS ABOUT THE ONE US DOLLAR EQUIVALENT. THERE ARE NO QUARTER MACHINES IN JAPAN BUT INSTEAD 100 YEN TOY MACHINES. MANY INTERESTING ITEMS CAN BE BOUGHT FROM VENDING MACHINES AND CAPSULE TOY MACHINES. ROBOKO CAME FROM A CAPSULE TOY MACHINE.

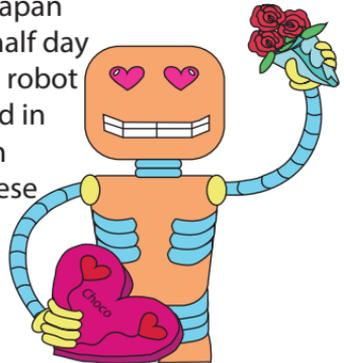

THE REAL KITSUNE

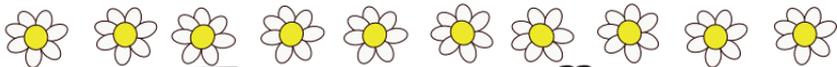

Kitsune is the Japanese word for fox; here Kitsune's father is a nine tailed fox that is an associate of the rice God Inari. Kitsune are shape shifters that can take on human form, and are tricksters that cause mayhem among the Japanese people.

WHAT IS A LOVE HOTEL?

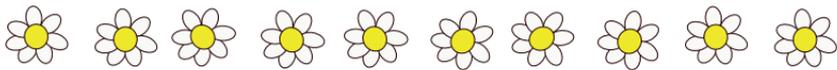

Love hotels are a very common hotel in Japan where room can be rented for the hour, half day or full night. They can be themed like the robot hotel in this game or a standard room and in Japan there are over 25,000 love hotels in Japan. Since many generations of Japanese people live together in one house, these hotels are often used by couples to get privacy.
